

WIN-911

THE MOST WIDELY USED ALARM NOTIFICATION PLATFORM IN INDUSTRY AND IIoT

Rockwell Automation

Rockwell Automation's FactoryTalk® provides a comprehensive and accurate picture of operations, meeting the demands of multiple stakeholders including engineering, maintenance, operations, and production IT. Throughout the world, their flagship Allen-Bradley® and Rockwell Software® product brands are recognized for innovation and excellence.

Android, iPhone, and Windows

SCADA INTEGRATION DIRECT CONNECTS

WIN-911 is a Rockwell Automation Encompass Product Partner. This partnership has allowed us to enhance FactoryTalk by providing real-time critical remote alarm notification.

WIN-911's integration with FactoryTalk Alarms & Events helps you realize the value of the Connected Enterprise by monitoring alarms & events and notifying the right person, wherever they may be.

WHAT CAN WIN-911 DO FOR YOU?

INCREASE:

- RELIABILITY OF ALARM NOTIFICATION
- OPERATIONAL EFFICIENCY
- INSIGHT INTO FREQUENT ALARM OCCURRENCES

REDUCE:

- DOWN TIME
- OPERATING COSTS
- MATERIAL COSTS

IMPROVE:

- ALARM RESPONSE TIME
- PERSONNEL AND PUBLIC SAFETY
- ALARM LOGGING AND REPORTS FOR CONTINUOUS IMPROVEMENT

SCHEDULING

Control notification logic utilizing individual and shared schedules evaluated at the time of the alarm. Complex shift scheduling made easy using an Outlook/Google style calendar control.

NOTIFICATION OPTIONS

ALL notification options support single or bi-directional communication, acknowledgements, and customized formats.

SMARTPHONE APPS

Interactive, intuitive APPS using push notifications for Apple, Android, and Windows devices.

SMS TEXT MESSAGING

Secure, text based alarm notification over cellular networks. Supports both USB and Ethernet IP cellular modems.

EMAIL

Rich HTML or plain text templates support a wide range of devices. Protocol support for SMTP, POP, IMAP, SSL/TLS.

VOICE CALLS

Text-to-speech engine dynamically reads alarm information. Supports VoIP (SIP) or analog phones (USB voice modem).

REPORTING

Rich or plain text report templates are available. Reports can be sent on demand or based on alarm conditions.

LOGGING

Supports both live and historical views. Sort, arrange print or export your alarm history based on your preferences. Includes personnel notification attempts and confirmation, acknowledgments, events and error codes.

SYSTEM MODIFICATION AUDITS

Leverage your existing SQL server auditing features to provide audit trail for regulated environments.

LOCALIZATION

Fully localized in 9 languages: English, German, Hebrew, Arabic, Italian, Portuguese, French, Chinese, Spanish. Localization includes software configuration, alarm delivery and alarm interaction.

TEXT-TO-SPEECH PREMIUM VOICES

Offered in 46 languages, Premium Voices provide a more natural sounding voice as an alternative to the standard Microsoft choices.

SOFTWARE & HARDWARE REDUNDANCY

Additional WIN-911 systems can be installed to provide greater reliability. Notification hardware and gateways can be pooled to increase uptime and reliability.

NOTIFICATION ESCALATION ENGINE

Configure notification workflows to best meet your operational needs. From a simple callout list to complex escalation logic, WIN-911's patented, script free, drag and drop user interface makes configuration easy and intuitive.

BASIC TACTICS

Simple Call out list that supports retries and delays.

<input type="checkbox"/>	Connection	Type	Retries	Delay Between Retries			Delay After			
<input type="checkbox"/>	John		0	Minutes	0	Seconds	0	Minutes	0	Seconds
<input type="checkbox"/>	Paul		0	Minutes	0	Seconds	0	Minutes	0	Seconds
<input type="checkbox"/>	George		0	Minutes	0	Seconds	0	Minutes	0	Seconds
<input type="checkbox"/>	Ringo		0	Minutes	0	Seconds	0	Minutes	0	Seconds

ADVANCED TACTICS

Script free work-flow dynamically follows your process.

- Scales from a simple call out list to comprehensive enterprise work-flows
- As the alarm event unfolds actions can be taken dynamically as alarm conditions evolve
- Workflow can enable event-based pushing of reports
- Easily adapts to personnel and organizational changes

ADVANCED STRATEGIES

Strategies orchestrate tactic execution.

Name South Station Alarms

Description includes rearming after 30 minutes

Policies

Condition	Action
Initial Event	Start Tactic → Operator Callout
Any Alarm State Change	Re-Notify
Upon Repeating Timer	30m → Start Tactic → Realarm
Alarm Becomes Terminal	Stop Strategy
